

# UPGRADE FROM STAND ALONE ANALOGUE – TO HYBRID – TO FULL IP – TO FULL CONTROL ROOM VMS AND PSIM CONTROL.

Millions of cameras around the world are managed by Dedicated Micros products. NetVu, through the Dedicated Micros brand, provides a platform of solutions which enable seamless upgrades from the earliest DS2s right through to full IP Virtual NVR. And with control room solutions to fit all types of camera network set ups, offering data integration, alarm handling and automatic cyber security.

Fully Integrated Control Room

**A H IP**

**PATH ONE**

Looking to upgrade but are concerned that a full refit to IP is too expensive? Path One is the solution for you. By opting for NetVu's Hybrid DVR option you can retain analogue cameras while starting the upgrade with a selection of IP cameras, all run on the same system.

**A IP**

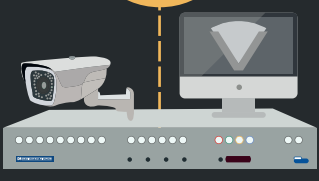

**PATH TWO**

Looking to change out everything to implement a fully IP solution - Path Two is an option for you. Opt for our powerful SD Advanced NVR and suite of high quality IP cameras, all protected from cyber threat by NetVu's unique Closed IPTV solution.

**A IP**

**PATH THREE**

Looking to change out everything to implement a fully IP solution - Path Three is another option for you. Opt for our powerful Virtual NVR along with our high quality IP cameras, protected from cyber threat by NetVu's in-house developed Closed IPTV solution.

DS2 or Ecosense, Analogue Cameras & NetVu ObserVer.
